

International cool TA-Q-BIN launched in Southeast Asia!

Fresh Japan seasonal products delivery to Singapore is now available

Yamato Holdings subsidiary Yamato Transport Co., Ltd. (Headquarters: Chuo-ku, Tokyo; President: Yutaka Nagao; "Yamato Transport" hereafter) will launch International Cool TA-Q-BIN services for delivery from Japan to Singapore on Wednesday, August 5, 2015. Following Hong Kong and Taiwan, this is the first small parcel door-to-door refrigerated delivery service to Southeast Asia.

1. Background

Because of the high rate of double-income household in Singapore, the culture of eating out is widespread and there are numerous food courts and restaurants. With its top GDP per capita in Southeast Asia, the needs for high quality Japanese food as well as the number of Japanese restaurants is rising every year in Singapore. However, high quality refrigerated transport service to send food products easily from Japanese are not yet available, making it difficult to deliver fresh seasonal Japanese products in small volumes on a frequent basis.

Yamato Transport had been cooperating with Okinawa prefecture and ANA Cargo to expand the exports of Japanese agriculture and fishery products using the Okinawa International Logistics Hub. International Cool TA-Q-BIN for Singapore will provide quality speedy transport, thus creating sales opportunities for Japanese businesses and accommodating needs to eat or provide fresh Japanese products in Singapore.

2. Features of International Cool TA-Q-BIN from Japan to Singapore

(1) Can send a minimum of one parcel from anywhere in Japan

International Cool TA-Q-BIN can be used from a minimum of one parcel via Sales Driver pickup or drop-off at our sales offices throughout Japan. Accepted parcel sizes are the same as the Japanese domestic cool TA-Q-BIN. Business opportunities will expand with the ability to easily send parcels on a daily basis to Singapore, where Japanese food is increasingly popular.

(2) The parcel can be received as early as the following day

With speedy international transport via the Okinawa International Logistics Hub, which has 24-hour customs clearance, parcels can be picked up from as early as 2 pm the following day at a Yamato Singapore branch office which is located in central Singapore. Another option is to have a Yamato Singapore Sales Driver to deliver it to your designated address from as early as the morning two days after the shipment.

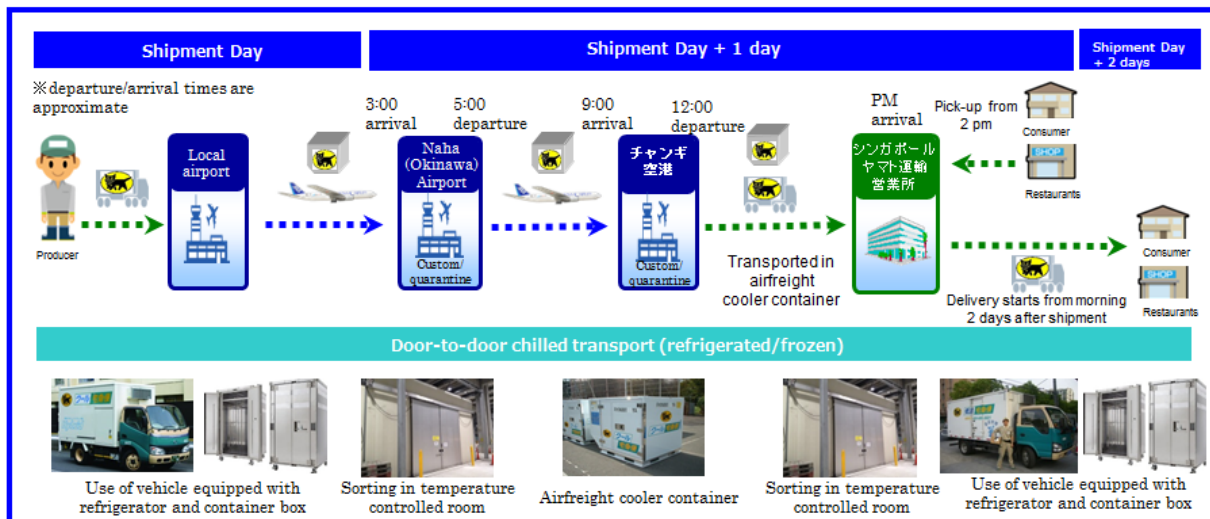

(3) Quality door-to-door refrigerated international transport of small parcels

Yamato Transport Singapore launched its TA-Q-BIN service in 2010 and offers refrigerated parcel delivery service within Singapore using refrigerated/frozen system-equipped vehicles, as in Japan. We will perform the chilled transport both within Japan and to Singapore using Yamato Transport's proprietary airfreight cooler container. By harnessing the Yamato Group network, we will deliver fresh product which will stay fresh from Japanese businesses to Singaporean consumers.
