

## International Cool TA-Q-BIN inaugurated for Malaysia

— Fresh delivery of Japan's seasons! —

Yamato Holdings subsidiary Yamato Transport Co., Ltd. (Headquarters: Chuo-ku, Tokyo; President: Yutaka Nagao; "Yamato Transport" hereafter) will begin International Cool TA-Q-BIN, a door-to-door chilled and frozen transport for small parcels, from Japan to Malaysia on Monday, March 28, 2016. This follows services already commenced to Hong Kong, Taiwan, and Singapore.

### 1. Background

Malaysia has shown marked economic development in recent years, and Japanese food has become more popular with heightened orientation toward luxury and health. Further, Japanese groceries that had only been sold at major department stores in the past are becoming increasingly available at supermarkets, specialty stores, and product fairs. Business opportunities will likely expand for Japanese businesses with the larger demand in Malaysia and immediate elimination of import duties with the TPP agreement.

Yamato Transport has offered the International Cool TA-Q-BIN service to Hong Kong, Taiwan, and Singapore for speedy, quality door-to-door refrigerated transport of small parcels through coordination with Okinawa prefecture and ANA Cargo and using the Okinawa International Aerial Logistics Hub. By expanding these services to Malaysia, we will contribute to accommodating Japanese food needs in Malaysia and expanding exports of Japan's agricultural and marine products.

### 2. Features of International Cool TA-Q-BIN from Japan to Malaysia

#### (1) Can send a minimum of one parcel from anywhere in Japan

International Cool TA-Q-BIN can be used from a minimum of one parcel via sales driver pickup or drop-off at our sales offices throughout Japan. Accepted parcel sizes are the same as the Japanese domestic Cool TA-Q-BIN. Business opportunities will expand with the ability to easily send parcels on a daily basis to Malaysia, where Japanese food is increasingly popular.

#### (2) Delivery as early as two days later, with all-day collection

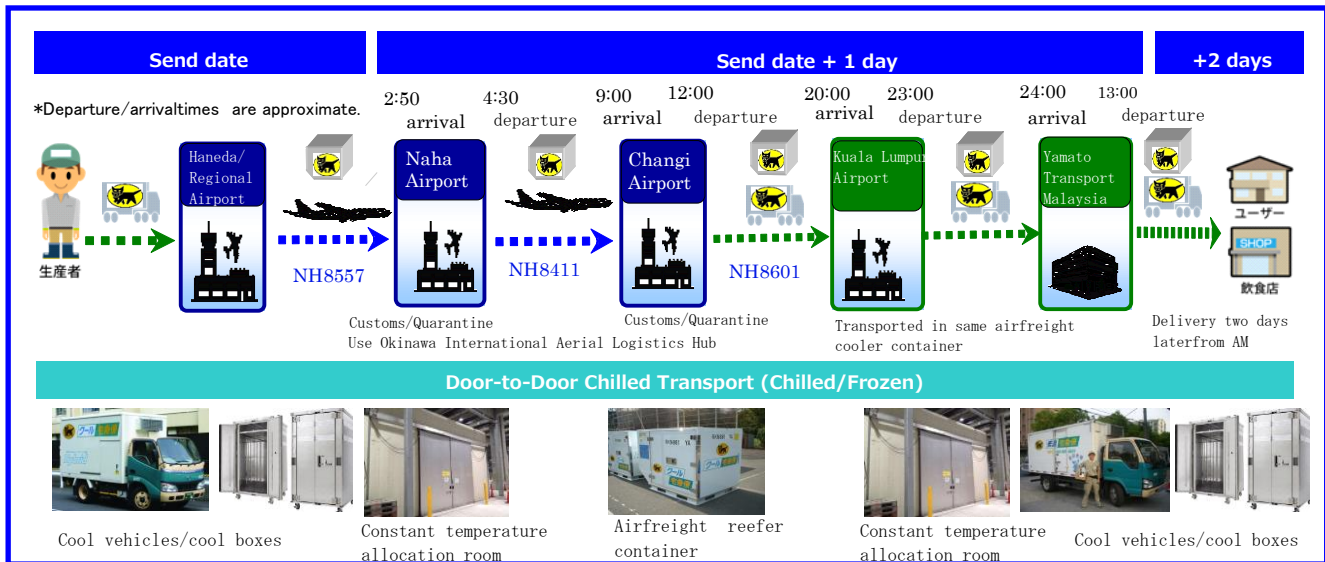

With speedy international transport via the Okinawa International Aerial Logistics Hub, which has 24-hour customs clearance, a Yamato Malaysia sales driver can deliver the package to a store or home as early as in the morning two days later.

#### (3) Quality door-to-door refrigerated international transport of small parcels

Yamato Transport Malaysia inaugurated its TA-Q-BIN service in 2011 and offers chilled & frozen parcel delivery service within Malaysia using chilled/frozen system-equipped vehicles, as in Japan. We will execute chilled transport within Japan, in air to Singapore and on ground from Singapore to Malaysia using Yamato Transport's proprietary airfreight reefer container. By harnessing the Yamato Group network, we will deliver fresh ingredients to the hands of Malaysian consumers.

<Flow from entrustment in Japan to delivery in Malaysia>

3. Service Start Date

Monday, March 28, 2016
